BW Behavior World

is a customizable, child-centered, positive reinforcement tool for parents, teachers and other individuals working with children!

MAKING GOOD BEHAVIOR FUN... ANYWHERE!

WHY IT WORKS

So what sets aside Behavior World from other apps? Here are some of the benefits that can be derived from using the app:

☑ It is compatible with all devices and environments. You can use it both in the home and in school.

☑ Teachers, parents and child are working towards a uniform goal and the objectives are clear-cut.

☑ The targeted goals are clearly identified without any visual or auditory clutter.

☑ Each environmental domain has suggested goals which can be upgraded or downgraded depending on the mastery.

☑ The app can be adjusted based on individual, group, or classroom objectives

☑ It is child-centered and is based on what kids want and not on what adults perceive as good for the kids.

☑ The child is involved every step of the way.

I ATE ALL MY DINNER.

I CLEANED UP MY TOYS.

I DID MY MORNING ROUTINE.

I COMPLETED ALL MY CLASSWORK.

I FOLLOWED DIRECTIONS.

I KEPT MY HANDS TO MYSELF.

OUR MISSION

Every kid deserves a shot at success. The Behavior World App is designed to help children enhance their behavior, gain new skills and maintain good habits. The app aims to assist parents, teachers, and the kid himself to achieve success.
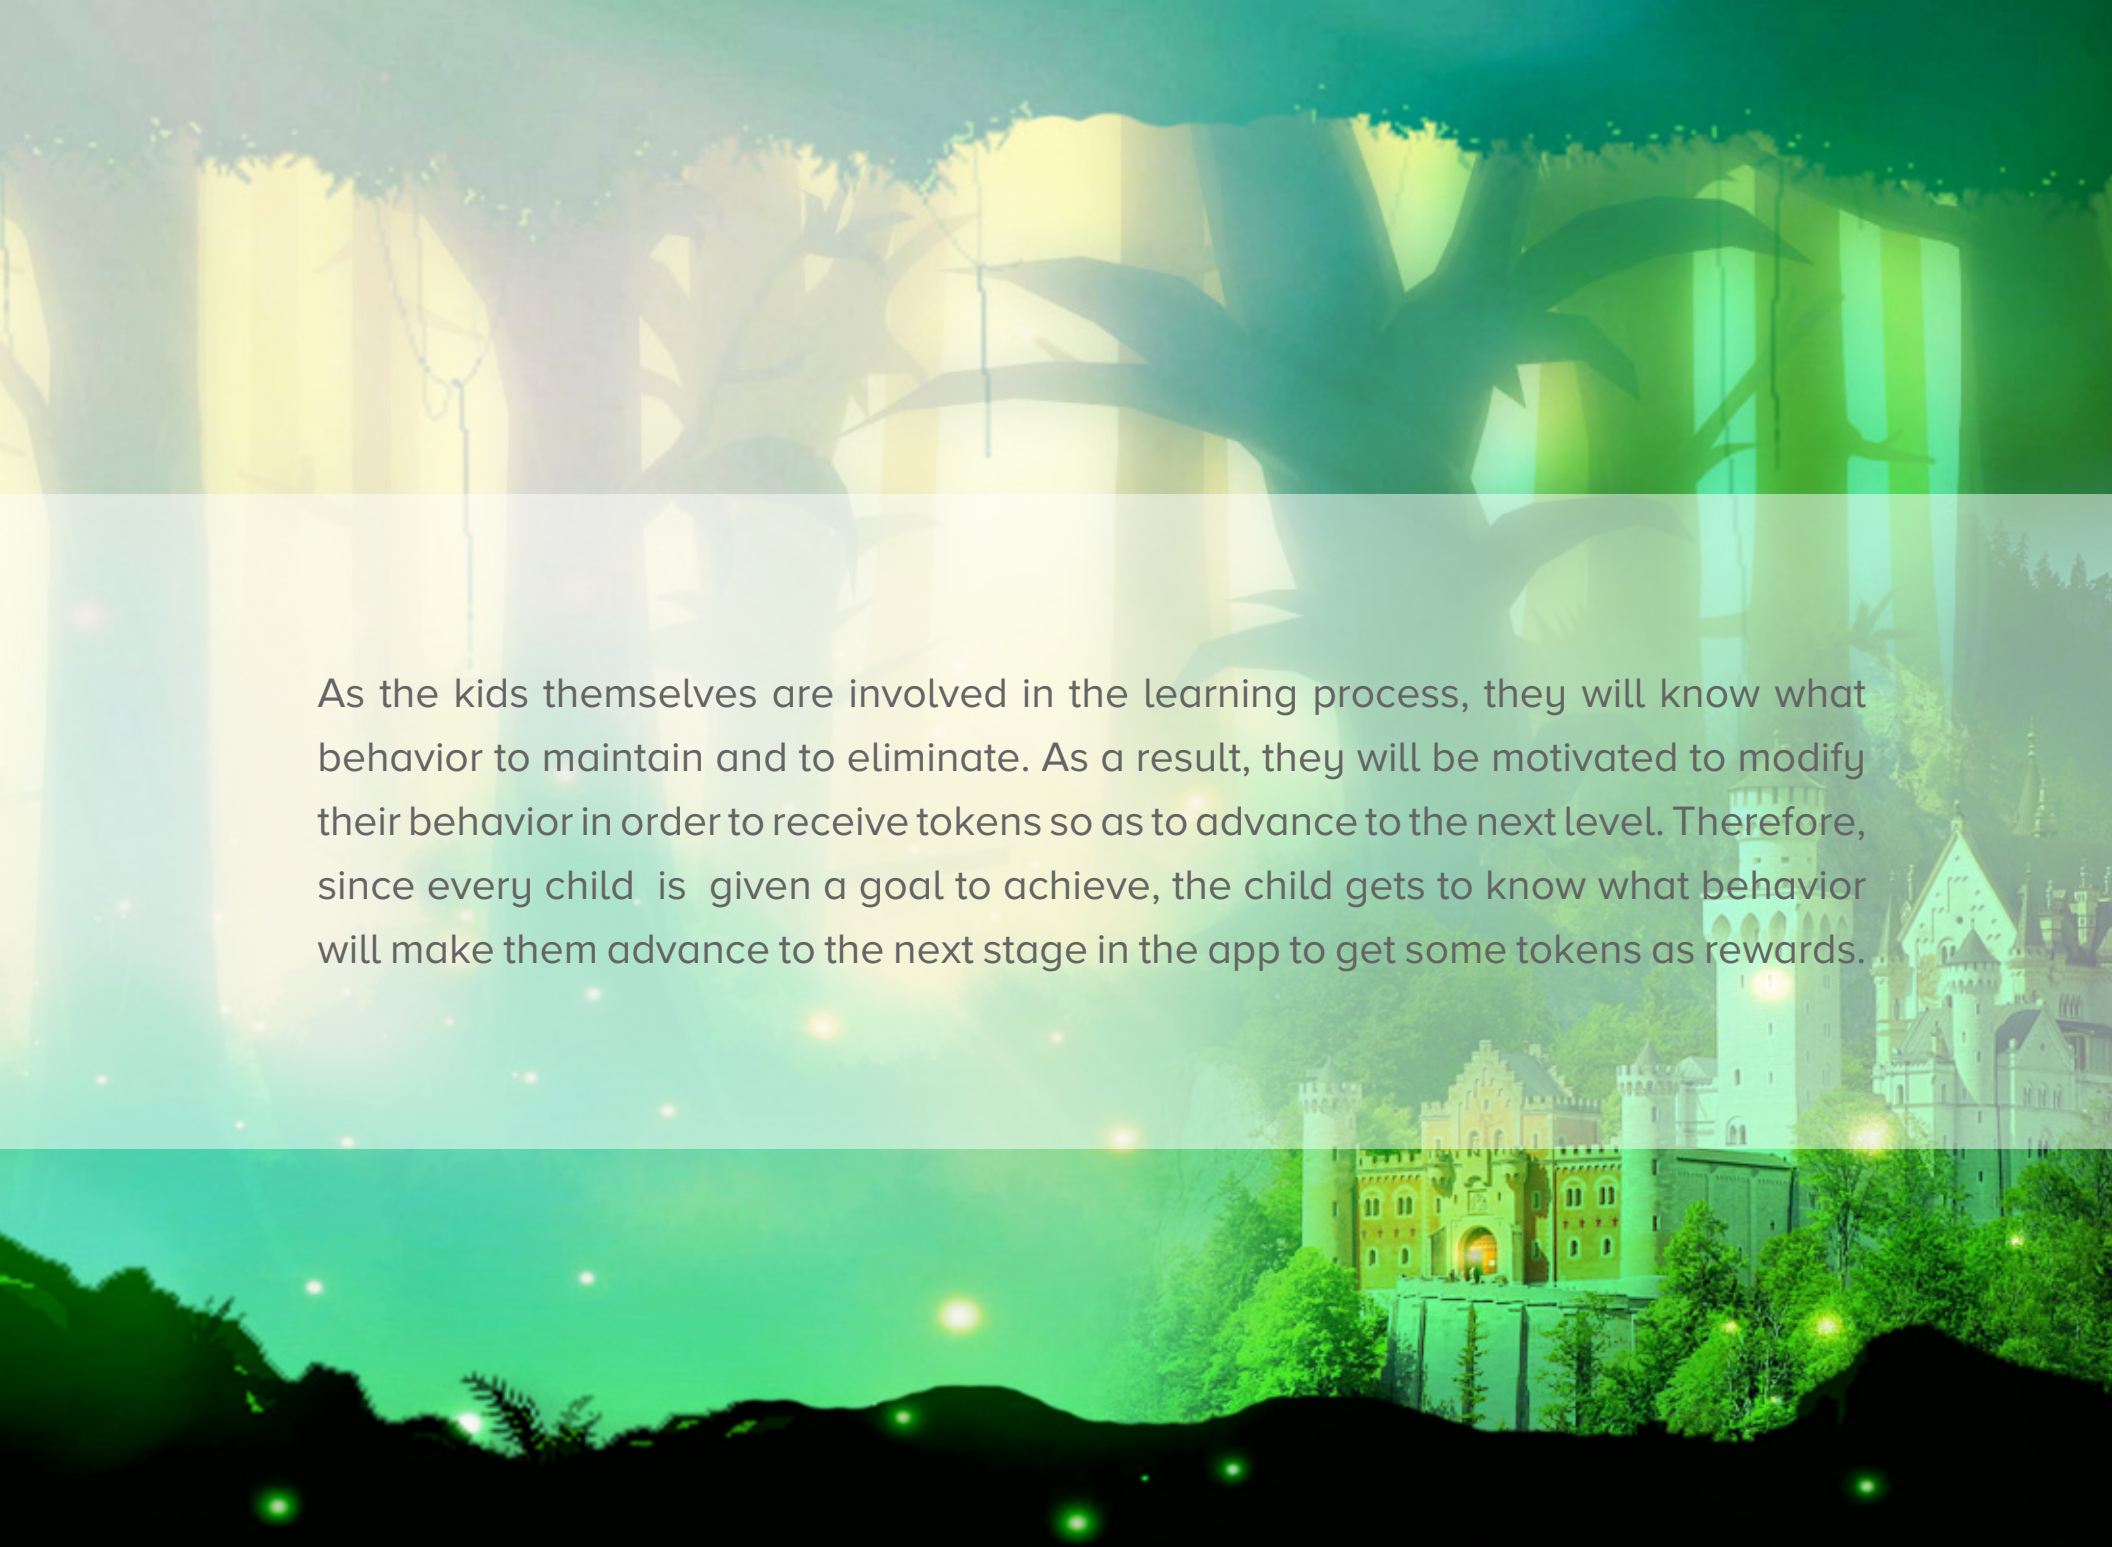

By using customizable behavior management charts, the app aims to motivate and encourage kids in achieving their goals of maintaining good behavior.

As the kids themselves are involved in the learning process, they will know what behavior to maintain and to eliminate. As a result, they will be motivated to modify their behavior in order to receive tokens so as to advance to the next level. Therefore, since every child is given a goal to achieve, the child gets to know what behavior will make them advance to the next stage in the app to get some tokens as rewards.

BENEFITS OF USING THE APP

Customizable Buddy and Background Theme. The avatar, as well as the theme, can be customized according to the preference of the child.
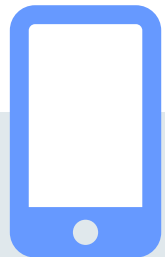

Bank of Behaviors. The behavior can be customized based on the personality of the child, student, or classroom.

Bank of Rewards. You can set the reward or "positive reinforcement" or create your own reward from the custom tab in the app.
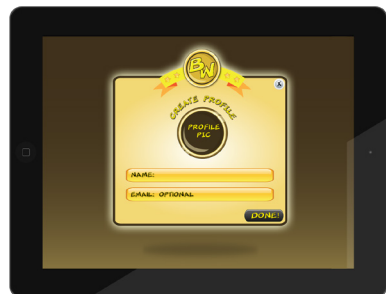

The app lets you customize behaviors according to the child or student's needs. You can also configure the rewards to encourage the child even more. In addition, you can customize the number of steps until a reward is earned.

HOW IT WORKS...

Setting up Behavior World is relatively easy. Here are the steps you need to follow:
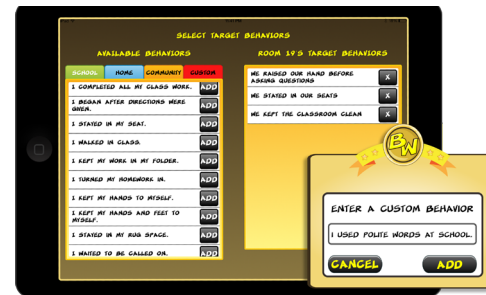

Step 1. Create an account

The parent, teacher or another adult creates an account. Once verified, a child or class is then added. In order to enjoy all the features of Behavior World, you will need to pay $2.99. Another option is to purchase small packages to get additional avatars or themes.

Step 2. Select A Buddy

The child chooses a buddy, an avatar, to be their partner in achieving goals. With 35 characters available, the child can customize their avatar according to their own preference. Aside from that, the child also sets his/her own desired theme and backdrop.
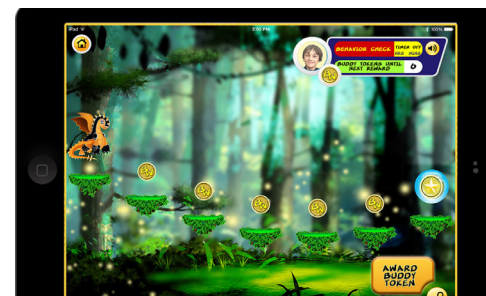

Step 3. Set A Goal

Through the Bank of Behaviors, the parent or teacher can easily choose amongst the list of behavior which their child or student will want to achieve. They can be selected from three tabs—namely home, school, and community. On the instance, that the the behavior you wanted your child to achieve is not listed on the tab, choose the custom tab to enter a "custom behavior."
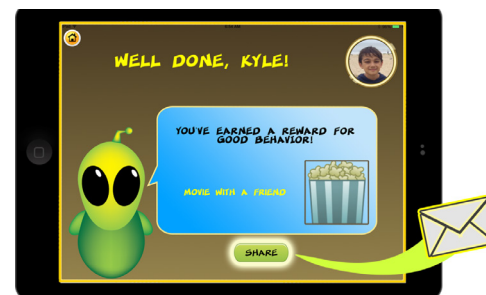

Step 4. Choose A Reward

The app comes with a Bank of Rewards where you can choose the "behavioral reinforcers." Set the reward that you want your child, student, or class to win once they achieve their goal. Just like in the Behavior tab, there is a tab for entering "custom reward." You can download a photo or select an image already stored in the device.
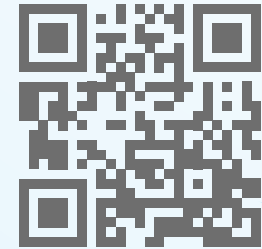

Step 5. Achieve Tokens

Once the behavior chart is completed, the next step is to award Buddy tokens. They are earned whenever the child gains an improved behavior. When a Buddy Token is earned, the child is a step closer to getting his/her reward.

Step 6. Get Recognized

When a reward has been achieved, the child receives a Certificate of Achievement. At the same time, both the parent or teacher will receive the Certificate via email. It is also recommended, that the child's Certificate of Achievement be also shared to other family members or relatives so the child gets additional recognition. Getting recognized for their efforts can motivate the child even further.
